

Armored Buses

In an effort to address the problem of civilian casualties in conflict zones, IAG is offering armored buses to provide protection for the transportation of personnel. Many cutaway truck chassis are suitable for this application, including the Ford E and F series, Mercedes Benz Atego and various International truck platforms. Both the driver and the passenger compartments can be armored to meet or exceed the CEN B6/NIJ III level of protection. Additionally, these buses are fully customizable; IAG can build an armored bus configured to meet all of your requirements.

Armored Audi Q5

IAG has recently designed a full armoring solution for the brand new Q5 crossover SUV from Audi. The 3.2L V6 engine produces 266hp, and the vehicle is equipped with Audi's famous Quattro AWD system for optimal performance even in adverse road conditions. The armoring is subtly integrated to the OEM chassis, providing a high level of ballistic and blast protection while maintaining a low profile appearance. Please contact us for inquiries on the armored Audi Q5 or any other luxury security vehicles.
