

New IAG Website

We are proud to announce that our new company website is ready for launch. The website will provide an insight to the technical aspect of armoring as well as feature a sample of our product range. Please visit www.interarmored.com for more information.

B7/NIJ IV Toyota Land Cruiser 200 Series

In response to attacks being stronger than ever, we have created the **B7 Toyota Land Cruiser 200** series, the highest level of protection attainable by current industry standards. This vehicle will withstand even the strongest attacks, including **7.62 x 51mm armor piercing rifle rounds**. As standard, the vehicle comes with a completely redesigned and upgraded suspension system, brakes, upgraded steel rims all around with run flat tires, and blast protection for floor and fuel tank. This vehicle is completely protected to **multiple shot B7 level**, including the sides, pillars, roof and rear of the vehicle. B7 Land Cruisers typically cost \$250,000 on the market, but we are offering a special introductory price of only **\$195,000**.

B6/NIJ III Nissan PKB-210 Cargo & Troop Transport

In order to fulfill military and private security company needs for a large armored vehicle, we have added the **B6 armored Nissan PKB-210** to our product range. The 4x2 heavy duty PKB is a popular chassis for armoring amongst operators in Iraq and Afghanistan due to its low profile and 10 ton payload capacity, making it ideal for transporting troops and supplies. The cabin is fully armored to the B6 level to protect the occupants. As with all IAG vehicles, the armored PKB is equipped with upgraded suspension including reinforced leaf springs to enhance handling. For more information please contact us at info@interarmored.com.
